Disclosure according to §25 Media Act:

FRESH VIEW is the international magazine showcasing the Austrian economy. • Publisher, media owner and editorial: Austrian Federal Economic Chamber, ADVANTAGE AUSTRIA, A-1045 Vienna, Wiedner Hauptstraße 63, T +43/590 900-4491, W www.advantageaustria.org • Publisher: Service GmbH of the Austrian Federal Economic Chamber, A-1045 Vienna, Wiedner Hauptstraße 63 • Concept: ADVANTAGE AUSTRIA • Editor in chief: David Bachmann • Text: Austrian Ministry for Transport, Innovation and Technology • Graphic concept: ADVANTAGE AUSTRIA and Inhouse Media/Inhouse GmbH of the Austrian Federal Economic Chamber • Graphics: lucid.at • Coordination, project management: Bettina Trojer, Martina Nemeth • Cover and symbol images: ADVANTAGE AUSTRIA • Cover/Illustration: bmvit/M.Paukner • Print: Wograndl Druck GmbH., A-7210 Mattersburg

All rights reserved. Reproduction in whole or in part is permitted only if the source is indicated and prior agreement is given. Despite careful checking of the contents, errors cannot be ruled out. No liability can therefore be accepted for the accuracy of the content. Company texts and images are supplied exclusively by the companies. The publishing company, the editor and the authors accept no liability. Autumn 2015.

根据《媒体法》第25条的信息披露:

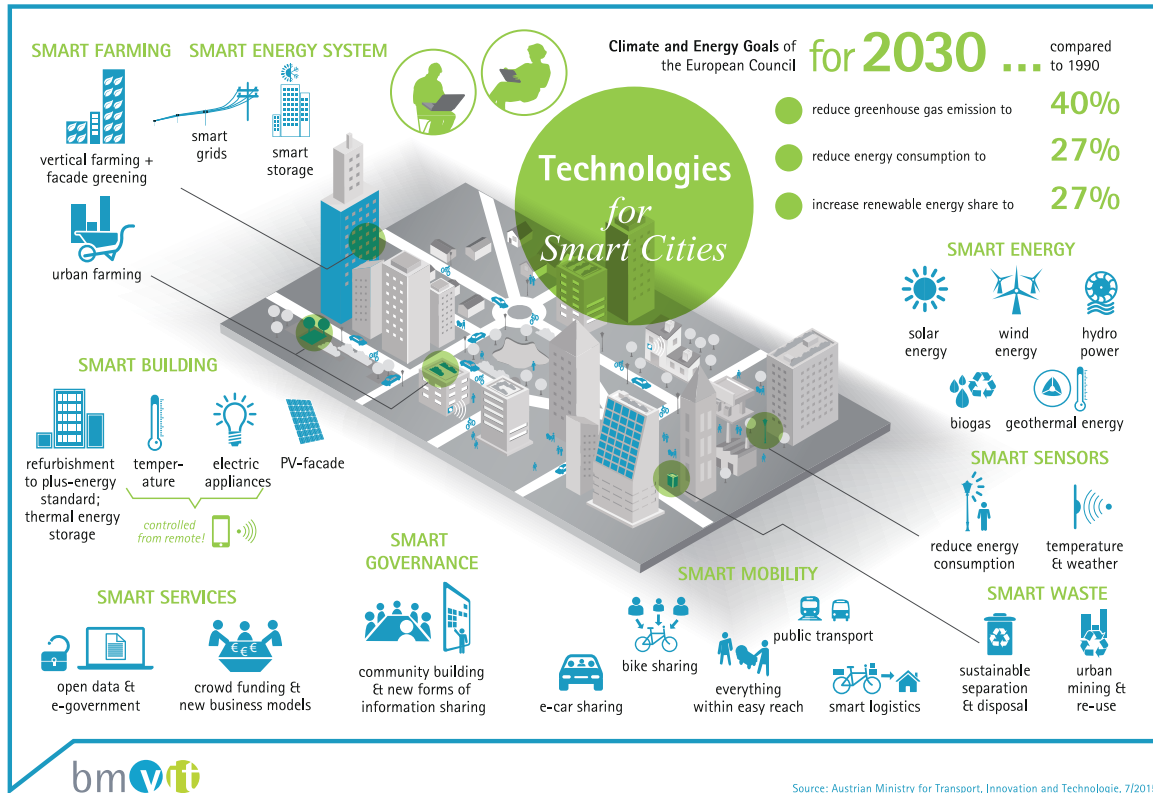

《全新观点》是一本展示奥地利经济现状的全球性杂志。• 出版商、媒体所有人及编辑: Austrian Federal Economic Chamber, ADVANTAGE AUSTRIA, A-1045 Vienna, Wiedner Hauptstraße 63, 电话: +43/590 900-4491, W www.advantageaustria.org • 出版商: Service GmbH of the Austrian Federal Economic Chamber, A-1045 Vienna, Wiedner Hauptstraße 63 • Concept: ADVANTAGE AUSTRIA • 主编: David Bachmann • 文案: 奥地利联邦交通、创新和技术部 • 图片设计: ADVANTAGE AUSTRIA及其下属媒体部 / 奥地利联邦商会下属有限责任公司 • 图片: lucid.at • 协调和项目管理: Bettina Trojer, Martina Nemeth • 封面和商标图片: ADVANTAGE AUSTRIA -封面 / 插图: bmvit/M.Paukner • 印刷: Wograndl Druck GmbH., A-7210 Mattersburg

保留所有权利。未经本公司事先明确同意,不得复制本出版物的部分或全部内容。尽管我们已对相关内容进行仔细检查,但仍无法确保毫无错误。因此,我们不对相关内容的准确性承担任何责任。企业的文字和图片信息均由其自身提供。出版公司、编辑及作者不承担任何责任。2015年秋。

This publication was funded in cooperation with the Federal Ministry for Transport, Innovation and Technology and by go-international, an internationalisation initiative established by the Federal Ministry of Science, Research and Economy and the Austrian Federal Economic Chamber.

此出版物由奥地利联邦交通、创新和技术部与“走向世界”联合出资并协助出版。“走向世界”是奥地利联邦科学、研究和经济部与奥地利联邦商会携手创立的国际化项目。

SMART CITIES MADE IN AUSTRIA

The future of humanity lies in intelligent cities

More and more people are moving into urban areas but at the same time resources are becoming scarce. At present 75% of the CO₂ emissions worldwide are produced by the burning of fossil fuels in the cities. Effective solutions for life in the cities must be found, not only just to reach emission targets.

The Federal Ministry for Transport, Innovation and Technology (bmvit), Austria's "smart city" ministry, supports the Austrian economy and research in the development of new technologies, as well as in the introduction of innovative products and services to the market at home and abroad. Austria plays a leading role in European technology in numerous areas relating to intelligent cities.

奥地利的智能城市

智能城市决定人类的未来

越来越多的人开始流向城区，但同时，城市的资源却越来越少。目前，城市居民燃烧化石燃料所排放的二氧化碳占到了全球排放总量的75%。为了实现减排并达成其他目标，在城市生活的居民应找到有效的解决方案。

奥地利联邦交通、创新和技术部 (bmvit) 负责推进全国的“智能城市”项目，致力于在发展新技术并向国内外市场推广创新产品和服务的过程中为奥地利的经济和科研活动提供支持。奥地利在欧洲大陆涉及“智能城市”的多个技术领域均发挥着主导作用。

This edition of our FRESH VIEW series of publications documents this domestic technological expertise: more than 160 Austrian companies and research institutions are listed on the following pages, divided into the Smart City categories of “Smart Mobility”, “Smart Energy”, “Smart ICT Infrastructure” and “Security”.

This Smart City catalogue of expertise is therefore not just a practical work of reference for people interested in the sector, but also provides impressive evidence of Austria’s leadership in technology.

The companies are presented according to the following areas of activity:

SMART MOBILITY

Innovative Solutions for Individual and Freight Mobility

Transport Infrastructure

ITS (Intelligent Transport Systems)

Vehicle Technologies

SMART ENERGY & ENVIRONMENTAL TECHNOLOGIES

Sustainable Energy Production

Energy-efficient Building & End-use Technologies

Energy Grids and Storage

Smart Urban Energy Services

Waste and Wastewater Management

SMART ICT - INFRASTRUCTURE (INFORMATION & COMMUNICATION TECHNOLOGY)

Innovative Communication Infrastructure

ICT for Energy and Mobility

e-government

e-health

SECURITY

Critical Infrastructure Protection & Security of Supply

Crisis & Disaster Protection Management

《全新观点》系列杂志推出的新一期内容见证了奥地利在专业技术领域的卓越成就：下文所列出的160多家奥地利企业和科研机构将分别归入智能城市的“智能交通”、“智能能源”、“智能信息技术基础设施”和“安全系统”版块。

这一涉及智能城市的专业分类不仅可为对特定行业感兴趣的读者提供实用的参考信息，同时也可作为奥地利在科技领域的领导地位提供令人信服的证明。

上述企业将根据下列业务领域进行分类：

智能交通

创新式客运和货运解决方案

交通基础设施

智能交通系统 (ITS)

交通技术

智能能源与环境技术

可持续的能源生产方式

节能建筑与终端技术方案

能源网与能源存储技术

智能城市的能源服务

废弃物和污水管理

智能信息通信技术-基础设施 (ICT)

创新的通信基础设施

能源行业和交通运输业的信息通信技术

电子政务

电子医疗

安全

关键基础设施的安保和安全系统

危机和灾难的救援管理

Cyber security

Migration & Integration

**SMART CITY -
URBAN DEVELOPMENT CONCEPTS**

网络安全

移民与融合

智能城市-城市发展理念

Mobility is the lifeline of the city

A well-organised transport system, which ensures unrestricted mobility for both people and goods, is the basis upon which the quality of urban life in a city is built and is a prerequisite for economic development in urban areas. The volume of traffic also increases in growing cities, as do the related negative effects on people and the environment.

The development of the infrastructure for individual motorised transport has reached its limits. In order to solve the traffic problems in

交通是城市的生命线

井井有条的交通系统可确保客运和货运的自由流动性，是城市居民生活品质的根基和城区经济发展的先决条件。在不断发展的城市中，交通日益拥堵，对居民和环境的负面影响也越来越大。

私人交通工具的基础设施已濒临发展上限。为了解决城市地区的交通问题，仅靠提倡使用低排放或零排放的车辆是远远不够的。智能城市

urban areas, it is also simply not enough just to switch to low-emission or emission-free vehicles. Smart cities rely on public transport as the backbone of urban mobility and, based on this, are looking for innovative concepts to increase the efficiency and safety of the transport infrastructure.

In a “Smart City” transport is viewed as a socio-technical system based on the needs of the users, whereby smart mobility decisions should be supported. The shift towards multimodal lifestyles is an indication of the readiness for new approaches in the field of personal mobility, if these are supported by innovative offers. In the face of an ageing society it is also increasingly important to guarantee easy access and freedom of barriers in the transport system. The great challenge in freight mobility is to reduce the amount of traffic on urban roads without restricting the continually increasing goods traffic. Multimodal logistic and lower emission control concepts are being developed to this end.

Austria’s industry has developed a high level of expertise and competitive advantages, particularly in the field of automotives, rail technology and intelligent transport systems. Small and medium-sized companies are producing promising and innovative mobility solutions and services, for example to make the transport system more attractive and improve accessibility. The transport science sector enjoys international recognition and shows particular strengths in the areas of traffic planning, modelling and simulation, as well as in socio-scientific mobility and behavioural research. Together these factors constitute a powerful portfolio of mobility expertise which means Austrian companies can contribute significantly to urban mobility solutions both at home and abroad.

The Federal Ministry for Transport, Innovation and Technology (bmvit), with its innovation and technology programmes, has set considerable impulses for innovations in the transport system in the last decades and in doing so represents an innovation-led transport policy for the creation of an efficient, safe, environmental-friendly and social transport system. The challenges faced by the cities are being addressed with new instrumental tools as well, for example in setting up urban mobility laboratories to research and test in practice new innovations and technologies.

依靠公共运输系统作为城市交通的主动脉，并在此基础上不断提出创新理念，以提高交通基础设施的效率和安全性。

“智能城市”的交通系统被视为以用户需求为基础而构建的社会技术系统，智能交通的决策也由此而获得支持。生活方式多样化的趋势表明：在创新的运输服务供应商的支持下，私人交通领域将涌现出更多新的交通模式。在日趋老龄化的社会中，确保交通系统的易用性和畅通无阻性也变得越来越重要。如何在不限货流量的同时减少城市公路的交通量是对货运系统的巨大挑战。为此，必须同时发展多式联运和防污减排理念。

奥地利的工业拥有很高的专业水平和较大的竞争优势（特别是在汽车、铁路技术和智能交通系统）。中小型企业正在探索潜力无限的创新式交通解决方案和服务，例如，提高运输系统的吸引力和可用性。奥地利在交通运输学领域取得了举世公认的成就，同时在交通规划、建模和仿真领域以及交通社会学研究和行为研究领域拥有特定的优势。这些因素共同构成了一系列有关交通运输的精深技术和专业知识，也意味着奥地利企业有能力为国内外的城市交通解决方案作出巨大的贡献。

在过去的几十年当中，奥地利联邦交通、创新和技术部（bmvit）及其创新的技术项目驱动着交通系统持续创新，不断推行以创新为导向的交通政策并致力于创立高效、安全、环保的公共运输系统。各大城市还通过新的工具解决当前的挑战，例如，设立可在实践中对新技术和创新项目进行研究和测试的城市交通实验室。

A smart supply of energy ensures the quality of life

In 2050 85% of the European population will live in cities, the energy requirements of which will continually rise. At the same time, in compliance with the climate objectives set by the European Council, the next step should be to reduce the carbon dioxide emissions in the European Union by a fifth by 2020 compared to 1990, to increase the energy efficiency by a fifth and the proportion of renewable energies to 20%.

In order to ensure the reliable and environmental-friendly supply of energy in growing cities, and to reach these ambitious goals in reduction, the existing energy infrastructure must be reorganized and modernised.

智能化的能源供应体系是生活品质的保障

2050年，城市人口将占欧洲总人口的85%，这意味着能源的需求也将持续上升。按照欧洲理事会制定的气候目标，下一步应该是到2020年将二氧化碳排放量在1990年的基础上减少20%，将能源效率提高20%，同时将可再生能源在总能源消耗中的比例提高到20%。

为了能够为不断发展的城市提供可靠、环保的能源，同时确保实现上述雄心勃勃的减排目标，必须针对现有的能源基础设施启动重组的现代化计划。

In this context “Smart Energy” means minimising the consumption through intelligent and flexible energy and storage systems and attaining a high as possible proportion of renewable energy. The aim is the “zero carbon” city – a city with neutral carbon dioxide. In order to achieve this, greater energy efficiency, a better use of the urban waste heat and a reduction of the final energy consumption are necessary.

For example, a smart urban energy system uses unwanted excess heat produced by the city for heating and hot water production or feeds it back into the district heating system. A city-wide virtual power station is created through the sophisticated interplay of numerous power generators and energy storage units. The dense structure so typical for cities is made use of in the building sector; improvements result not only from highly efficient individual buildings, but also through integrated solutions for blocks of houses, districts or whole cities.

A particular challenge in European cities is to rebuild and renovate existing building material without restricting the inhabitants and taking historical urban structures into consideration. An example of this is the SINFONIA project (“smart initiative of cities fully committed to invest in advanced large-scaled energy solutions”), which aims to use comprehensive, integrated and multipliable energy solutions in medium sized European cities. The cities of Bolzano (I) and Innsbruck (A) are striving jointly to save 40-50% of primary energy and to increase the proportion of renewable energy by 20%. The goals should be reached through a series of measures which combine the refurbishment of more than 100 000 m² of living space, the optimisation of the power system and solutions for heating and cooling networks in the urban areas (www.sinfonia-smartcities.eu).

Under the umbrella of the programmes “Building of Tomorrow”, “Energy Systems of Tomorrow” and the energy research programme of the Climate and Energy Fund, the Federal Ministry for Transport, Innovation and Technology has for many years been investing intensively in innovative energy technology, especially in the urban sector. Austria therefore has a very good international reputation in the fields of solar, wind and environmental energy, environmental-friendly buildings and smart energy systems.

在这一背景下，“智能能源”意味着通过灵活的智能能源存储系统降低能源消费量并尽可能提高可再生能源的消费比重。其目标是打造保持碳中和状态的“零碳城市”。为此，有必要提高能源效率、更好的利用城市的余热并减少最终的能源消耗。

例如，智能城市的能源系统可利用余热为城市供暖或提供热水，或将回收的余热用于该地区的供暖系统。亦可利用多个发电系统和储能单元之间的复杂作用在全城建立虚拟电站。建筑行业普遍采用了城市中最典型的密集型结构，同时通过高能效的单栋建筑、建筑群、整片地区乃至整座城市的综合解决方案进一步提高能源利用率。

如何在保护城市历史建筑的同时，重建和翻新现有的建筑并避免为居民带来不便，是欧洲城市特有的挑战之一。SINFONIA计划（“投资先进的大规模能源解决方案的智能城市项目”）是这一领域的典型案例，该计划旨在利用综合的多元化集成式能源解决方案，在中等规模的欧洲城市。博尔扎诺（I）和因斯布鲁克（A）正采取共同行动，以节省40-50%的初级能源，同时将可再生能源的消费比重提升20%。应通过一系列措施将城区供暖和供冷系统解决方案、电力系统的优化以及居住空间（10万平方米以上）的装修工程相结合，以促成上述目标的达成。（www.sinfonia-smartcities.eu）。

多年来，奥地利联邦交通、创新和技术部一直通过“未来的建筑”、“未来的能源系统”以及气候与能源基金会的能源研究计划等一系列项目对创新的能源技术（特别是对城市能源系统）进行广泛的投资。因此，奥地利因在太阳能、风能和环保能源、绿色建筑和智能能源系统领域的贡献而享誉全球。

For the inhabitants of a city “Smart Energy” means above all a higher quality of living as a conventional energy system based on fossil fuels can pose a threat to the health of the population in growing metropolises – keyword fine particulate matter.

Through the intelligent use of above all renewable energy sources such as biomass, wind-, solar- and hydro-power, the production of toxic emissions can be avoided and the total energy consumption reduced.

对于城市居民而言，“智能能源”首先意味着更高的生活品质，因为基于化石燃料的传统能源系统将为日益发展的城市的居民带来健康威胁，而细颗粒物污染就是其中的关键因素。

利用上述所有可再生能源（如生物质能、风能发电、太阳能发电和水力发电）的智能系统，可避免排放有毒污染物并减少能源消耗总量。

ICT are the foundation of innovative urban development

Information and communication technologies (ICT) are an integral part of everyday life. They transmit data, control processes and enable intercommunication. Through their use many tasks can be completed more smartly.

信息通信技术是城市创新发展的基础

信息通信技术（ICT）是日常生活的重要组成部分。信息通信技术可用于发送数据，控制流程并促进互联互通。信息通信技术有助于更圆满的完成许多任务。

As generic technologies they bring about innovation in many areas, make it possible to meet the challenges facing society and even bring about changes in people's behaviour.

A city is a complex organism and therefore also subject to permanent change. Through the use of intelligent technologies the quality of life of its citizens can be increased. On one hand components in the infrastructure such as sensors, mobile devices, secure WLAN, glass fibre cables and data storage are necessary. On the other hand, easier access and processing procedures provide new services in e-government, e-commerce and e-health. Apps enable targeted use and navigation, which in turn provide support for infotainment and tourism.

As part of a public administration set-up, all citizens will have access to platforms storing big data which can be used to generate new applications and business models.

Further sociological developments include the concentration of the population and as a consequence the growth of the cities, the ageing society and the inclusion of the population in decision making processes. Collaborations in training and further education, as well as "Citizen Science" are also increasingly sought after. From a technical point of view, faster processing services will be necessary to handle the increasing amount of data and to make the information generally available, while at the same time guaranteeing data security and the observance of all ethical aspects.

Miniaturisation and virtualisation increasingly merge to form augmented reality, which can already be found today in many planning tools and simulators. The personalisation of services or location-based services in the vicinity are helpful to individual target groups – specific needs can be taken into consideration here. Robots and artificial intelligence can be increasingly used to facilitate people's activities.

The Federal Ministry for Transport, Innovation and Technology funds the research programme "ICT for the Future" with an annual budget of EUR 20 million. In the four technological areas of Systems of Systems, Trusted Systems, Intelligent Systems and Interoperable Systems, ICT solutions are being constantly developed in joint cooperation with scientific and industrial partners and implemented in the respective fields of application.

作为一种通用技术，信息通信技术可为多个领域带来创新，有助于更好应对当前社会所面临的挑战，甚至可能导致人类行为的变化。

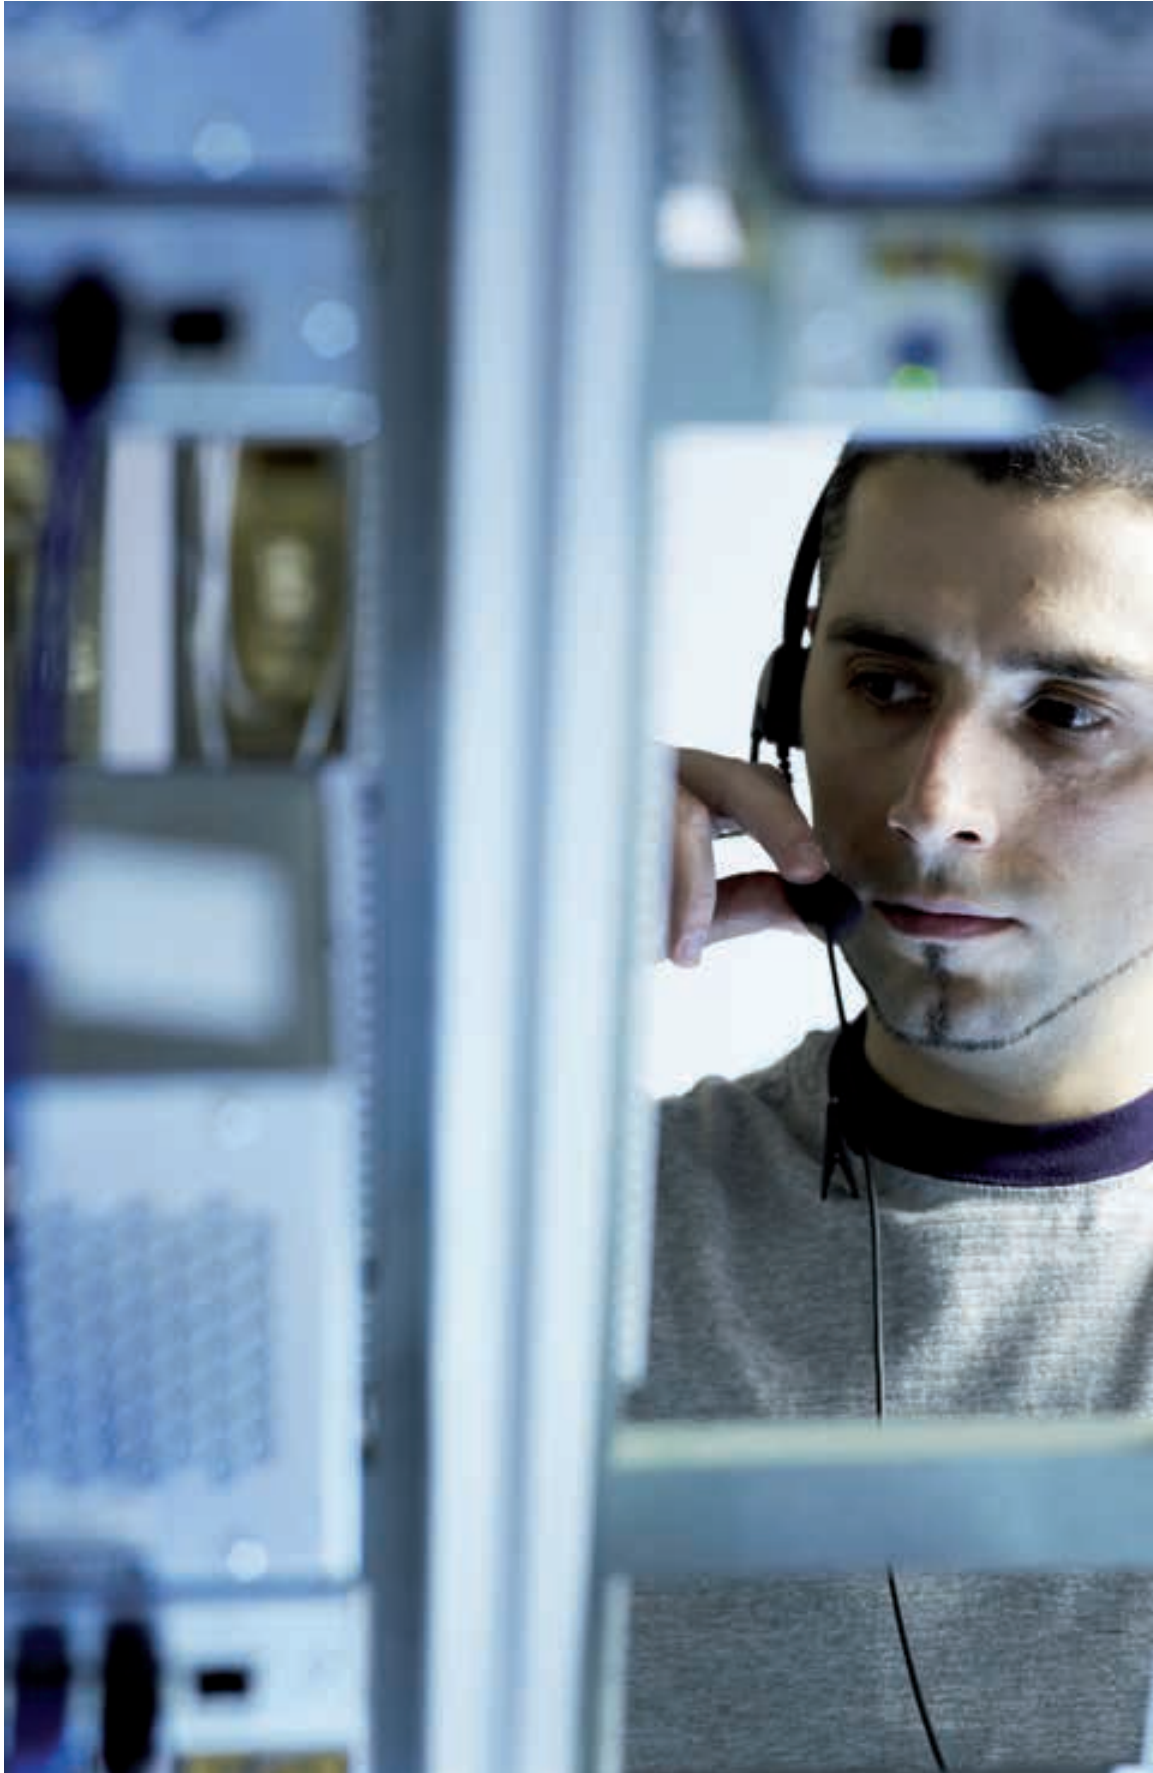

城市是复杂的有机系统，处于不断的运动变化之中。智能技术有助于提高城市居民的生活品质。一方面，传感器、移动设备、安全的无线局域网、玻璃纤维光缆和数据存储系统等组件对于基础设施是必不可少的。另一方面，易用性和处理程序有助于为电子政务、电子商务和电子医疗等领域提供新的服务。应用程序可提供有针对性的使用和导航服务，这反过来又将为娱乐业和旅游业提供支持。

作为公共管理系统的一部分，所有公民均有权访问可催生新的应用和商业模式的大数据存储平台。

社会进一步发展的结果包括：人口的集中及由此而导致的决策过程中的人口融合、城市发展和社会老龄化问题。培训和继续教育以及“公民科学”项目中的合作模式也逐步得到普及。从技术的角度来看，处理日益增多的数据、提高信息普及性都需要加快信息处理的速度，同时还应确保数据的安全性并遵循所有道德标准。

小型化和虚拟化趋势共同催生了增强现实技术，这一技术在当代多种规划工具和模拟程序中得到广泛应用。个性化服务或周边位置服务对于个人目标群体大有裨益，可将具体的需求纳入考量范围。机器人技术和人工智能逐步普及，为人类的活动提供便利。

奥地利联邦交通、创新和技术部以2000万欧元的年度预算为“未来的信息通信技术”研究计划提供资金。在科研和工业合作伙伴的鼎力支持下，复合系统、可信系统、智能系统和互操作系统这四大技术领域持续发展信息通信技术解决方案，同时各自的应用领域内不断将上述方案付诸实践。

Smart Security for Smart Cities

The intelligent city offers its inhabitants a new quality of living, which is characterised by innovative concepts in the areas of housing (smart home), energy (smart energy), public administration (smart government, e-government) and mobility (smart mobility).

Behind the smart city there is an ever-growing network. Huge amounts of data are generated in a smart city, transferred and then made available for new services. The increased networking however also makes the modern city more vulnerable. That is why it is necessary to protect the intelligent systems from attacks and the personal data of the citizens from unauthorised use.

It is a question of guaranteeing security in a rapidly changing environment. In the interests of "smart security" a concept is necessary which can be customised to suit whichever innovative security solution happens to be required. Here it is particularly important that new technologies are socially acceptable and can be used by the citizens.

The Austrian security research programme KIRAS is following exactly this approach to smart security. The compulsory inclusion of the potential end-users of the new security technologies ensures that research into the needs and demand takes place in the early phases of the project.

Furthermore, through the integration of experts in the humanities, social and cultural sciences, KIRAS is a prime example of responsible technological development. Intelligent solutions to increase the resilience of the smart city, for example technology for safer smart grids and the strengthening of the cyber-infrastructure against unauthorised access, are only some examples of KIRAS innovations in the context of a smart city.

Finally, with the KIRAS programme, the Federal Ministry for Transport, Innovation and Technology is also supporting the domestic security industry in that it can maintain its competitive advantage and generate added value. The "smart and secure" objective is therefore not only of benefit to the citizens but also to Austria as a business location.

智能城市的智能安全

智能城市为居民提供了前所未有的生活品质，在住房（智能家居）、能源（智能能源）、公共管理（智慧政府和电子政务）和交通（智能交通）领域的创新理念均为这一生活模式的鲜明特点。

智能城市背后涌现出一个不断拓展的网络。智能城市可产生并传输大量数据，并将其应用于新型服务。然而，不断拓展的网络也令现代城市更加脆弱。这就是必须保护智能系统免受攻击并避免公民的个人资料被非法盗用的原因。

这是事关在瞬息万变的环境中保障信息安全的问题。为了实现“智能安全”的目标，应满足所有创新的安全解决方案的个性化要求。因此，新兴技术获得社会认可并被公民广泛采用就显得尤为重要了。

奥地利的安全研究计划KIRAS严格遵照上述方法推广智能安全系统。针对最终用户采用新兴安全技术的强制性规定确保在项目的早期阶段即可对相关需求开展研究工作。

此外，集人类学、社会学和人文科学专家之大成的Kiras还为负责任的科研活动树立了典范。旨在提高智能城市的适应力的智能解决方案（例如：更安全的智能电网技术和加强对网络基础设施访问权限的管理等）仅仅只是KIRAS在智能城市的创新领域中取得的部分成果而已。

奥地利联邦交通、创新和技术部支持凭借KIRAS计划为其国内的信息安全行业提供支持，助力其保持竞争优势并产生更高的附加价值。因此，“智能和安全”目标不仅将有利于公民，同时也可帮助奥地利打造更好的营商环境。

The intelligent city of the future

Cities are growing all over the world and their structures are becoming more complex. In the context of a “smart city”, urban development means finding innovative solutions in numerous areas, for example energy supplies, the conserving of resources, mobility and information and communication technologies. Together all of these new technologies can significantly increase the quality of living and make our cities more environmentally friendly through clever use of our resources.

The Federal Ministry for Transport, Innovation and Technology supports new technologies which are geared towards the smart city with several innovation and technology programmes, e.g. “City of Tomorrow”, in which the focus is not just on the efficiency of a single Building but on whole districts. With programmes such as “Lighthouses in electro-mobility” the bmvit also supports the search for solutions for the constantly increasing urban traffic for both individuals and goods. The security research programme KIRAS finds answers to questions of smart security.

未来的智能城市

全球各大城市都处于不断发展之中，其结构也变得日趋复杂。在“智能城市”的背景下，城市的发展意味着在多个领域中（例如：能源供应、资源节约、交通运输以及信息通信技术等）寻找创新的解决方案。所有这些新兴技术均可通过巧妙利用资源改善生活品质并打造更环保的城市。

奥地利联邦交通、创新和技术部通过多个创新的技术项目（如“未来的城市”）为面向智能城市的新兴技术提供支持，其重点在于提高单栋建筑乃至整片地区的能效。bmvit还通过“电子交通的灯塔”等项目为制定更多可不断改善城市客运和货运交通的解决方案提供支持。奥地利的安全研究计划KIRAS致力于解决智能安全领域的问题。

And last but not least, the project “ICT of the Future” carries out research into the all-pervasive digitalisation of all areas of life. Furthermore the resulting innovations strengthen the domestic business location as intelligent answers to urban planning issues are in demand worldwide.

One example of a global project is “United Smart Cities” which was initiated by the OiER (Organization for International Economic Relations) & UNECE (United Nations Economic Commission for Europe) and which enables companies to act as exclusive industrial partner in their specific industrial sector, to establish strategic partnerships with the cities and their decision makers, and to play an advisory and leading role in sustainable urban planning (for more information, please visit www.unitedsmartcities.com).

Cooperation is the central building block on the way to a smart city: cooperation between research institutes, between the population and the public administration, as well as between the various aspects of the intelligent city. The Innovation-promoting public procurement (IÖB) plays a significant role here. In buying as innovative products as possible, the public authorities can improve not only the public services and infrastructure for the citizens but also actively support the innovative development in the cities.

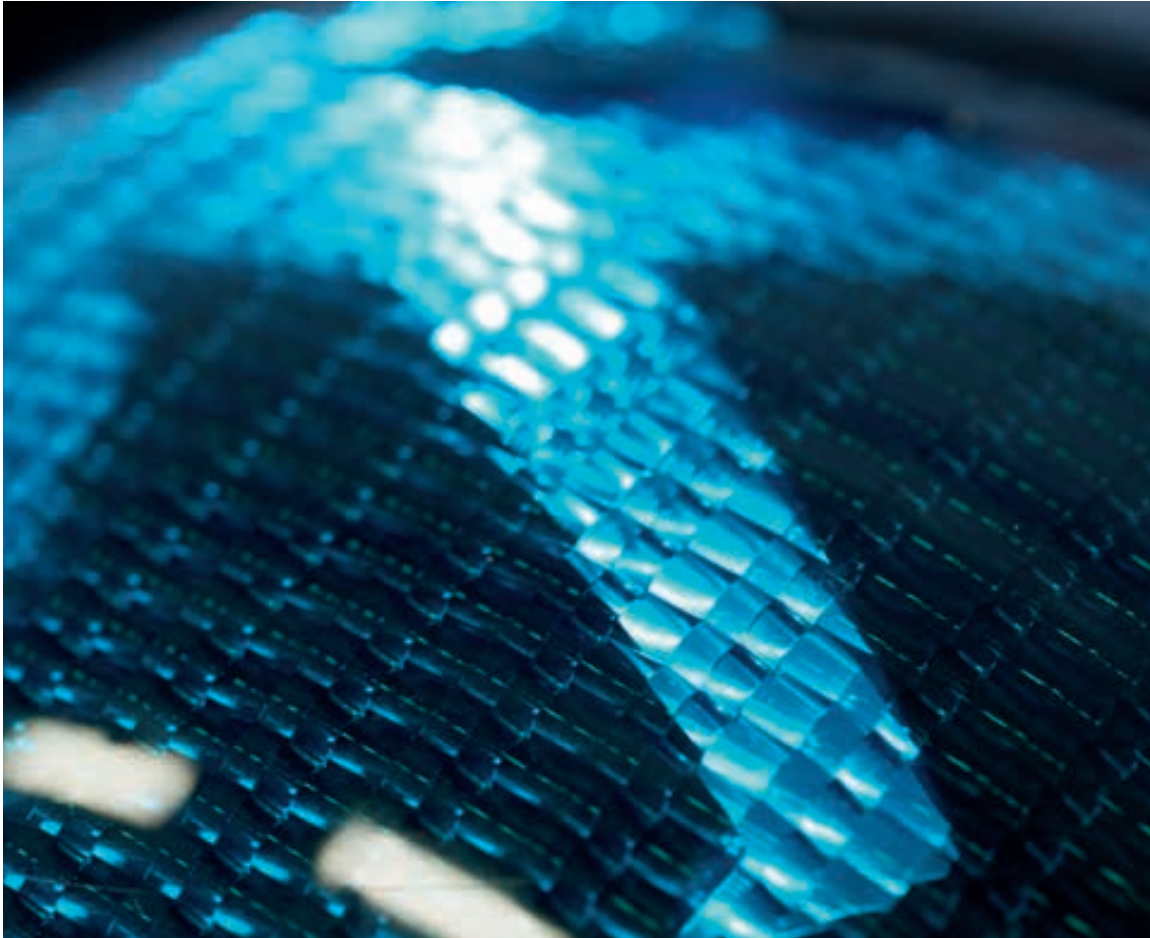

Projects such as “Open Government Data” contribute just as much to a smart city as a sophisticated and safe transport system. All these aspects should be considered in the creation of urban planning concepts. Smart city planning takes into account the needs of everyone who lives in the city without forgetting about leisure areas and green oases which, in view of the rising global temperatures, help to make the climate in the city bearable, especially in summer, and are also a means of strengthening the social cohesion.

同时，“未来的信息通信技术”项目还致力于在遍及生活方方面面的数字化领域内开展研究工作。此外，由于智能城市的规划可满足世界各国的发展需求，因此，由此而催生的创新技术也有助于改善奥地利国内的营商环境。

“统一的智能城市”是全球性项目的一个典型示例：该项目由国际经济关系组织（OiER）和联合国欧洲经济委员会（UNECE）联合发起，旨在帮助各大企业以特定工业领域的独家工业合作伙伴的身份，与所在城市及其决策者建立战略合作伙伴关系，同时城市的可持续发展规划中提供意见咨询并发挥主导性作用（如需了解更多信息，敬请访问：www.unitedsmartcities.com）。

合作是构建智能城市的核心基石：既包括研究机构之间的合作，也包括普罗大众和各级政府以及智能城市中各行各业之间的合作。促进创新的公共采购制度创新（IÖB）可发挥重要的作用。公共部门在购买最先进的创新产品时，不仅可以为公民提供日趋改善的公共服务和基础设施，同时还能积极支持城市的创新式发展。

与先进而安全的交通系统一样，“开放政府数据”等项目也可以为建设智能城市作出巨大的贡献。在制定城市规划理念时，应将上述所有方面均纳入考量范围。智能城市规划必须考虑所有城市居民的需求，还应结合休闲区和绿化区的设计。在全球气温持续上升的背景下，休闲区和绿化区将有助于改善城市的气候条件（尤其是在夏天），同时也是增强社会凝聚力的有力工具。

SUCCESS STORIES

HIGH STANDARDS IN TRAFFIC SAFETY

Wherever you are on the roads, you are likely to come across products made by SWARCO AG. The Austrian company is an internationally successful traffic technology group whose products can be found worldwide.

SWARCO is the global leader when it comes to traffic lights and LED signal technology. Reflex glass beads and road marking systems, dynamic traffic management systems for motorways and tunnels, traffic signs and signposts, road lighting using LED technology and parking management systems, all provided by SWARCO, can be found in over 60 countries around the world.

成功案例

严格的交通安全标准

SWARCO公司的产品在每一条公路上都随处可见。这家奥地利公司现已发展成为享誉全球的交通科技集团，其产品遍及世界的每一个角落。

SWARCO是交通灯和LED信号技术的全球领导品牌。SWARCO生产的反光玻璃珠和路标系统、高速公路和隧道的动态交通管理系统、交通标志和指示牌、用于公路照明的LED灯具及停车场管理系统远销全球60多个国家。

SWARCO's products, systems and services for traffic safety and intelligent traffic management help maintain the flow of traffic and inform and guide road users in the best possible way. SWARCO's complete solutions support society's growing need to travel in an energy-efficient and environmentally-friendly way. A concept with a future.

TRANSPORT SYSTEMS OF THE FUTURE

Austrian company Doppelmayr Seilbahnen GmbH transports passengers worldwide with their ropeway technology and light rail systems.

Whether it's in Austria, Las Vegas, Singapore, Toronto, Mexico City, Venezuela or Azerbaijan, Doppelmayr funiculars and cable liners can be found all over the world.

Doppelmayr have built the world's longest reversible aerial ropeway in Tatev, Armenia. And if you travel by car to Venice, an 830-m cable liner shuttle will take you from the parking garages on the island of Tronchetto to Piazzale Roma with a stop off at the ferry port. With projects all over the world, these are just some of the innovative and efficient passenger transport systems developed by the designers and engineers of the Doppelmayr/Garaventa Group.

SPECIALISTS IN SECURE VOICE COMMUNICATION

What do the European Air Traffic Control Agency Eurocontrol, London's Scotland Yard and US Space Agency NASA have in common? They all rely on communication solutions provided by Frequentis AG.

The global corporate group based in Vienna has been supplying communication and IT systems for safety-critical applications since 1947 — whether it's for civil or military air traffic management, the area of public safety (police, fire, rescue service) or for rail

SWARCO的交通安全和智能交通管理产品、系统和服务有助于维护稳定的路况，同时尽可能为驾乘人员和行人提供信息和指引。SWARCO的一整套解决方案可为整个社会对节能和环保的出行方式日益增长的需求提供支持。面向未来的理念。

未来的交通系统

奥地利公司Doppelmayr Seilbahnen以其索道技术的轻轨系统为世界各地的乘客提供客运服务。

奥地利、拉斯维加斯、新加坡、多伦多、墨西哥城、委内瑞拉、阿塞拜疆……世界各地都可以看到Doppelmayr funiculars品牌及其空中缆车的身影。

Doppelmayr已在亚美尼亚塔特夫搭建了世界上最长的双向索道。如果您搭乘汽车到威尼斯，那么一条长达830米的空中索道将把您从特隆盖托岛的停车场送往罗马广场，亦可中途在轮渡码头下车。Doppelmayr/Garaventa集团的设计师和工程师在世界各地开发了众多高效的创新式客运系统，这些仅仅只是其中的部分项目而已。

安全的语音通信系统的专家

欧洲航空安全组织Eurocontrol、伦敦警察厅和美国国家航空航天局（NASA）有何共同之处？它们都依赖于Frequentis公司提供的通信解决方案。

自1947年以来，这家总部位于维也纳的跨国集团一直致力于为对民用或军用空中交通管理、公共安全领域（警察、消防和救援服务）及铁路和海运系统的安全至关重要的应用提供信息通信系统。Frequentis的解决方案及基于各大项目的专业知识深受全球110多

and maritime systems. Customers in more than 110 countries around the world place their trust in Frequentis solutions and project expertise.

The main drivers of the company's market success are its innovative strength and technological focus, with particular attention paid to an optimised human machine interface. With a market share of 30%, Frequentis is the global market leader of voice communication systems for air traffic management.

THERMAL ENERGY FROM DESERT SUN

GREENoneTEC is the world's largest producer of solar thermal collectors. In 2010, the company received a very special order.

GREENoneTEC currently supplies collectors for the largest solar thermal plant project in the world, Princess Noura Bint Abdulrahman University for women in Riyadh, Saudi Arabia.

The area is equivalent to that of an independent city. It provides space for 40,000 students, teachers and other employees, for 13 faculties, accommodation, research facilities and a hospital.

The energy supplied by the GREENoneTEC collectors serves to provide hot water and heating for the entire campus and covers a collector area of more than 36,000 square metres, which equates to 5 football pitches.

个国家的客户信赖。

其创新力和技术重点以及对人机界面优化问题的特别关注是该公司在市场大获成功的主要驱动因素。Frequentis是空中交通管理用语音通信系统的全球领导品牌，其市场份额高达30%。

沙漠地区的太阳能

GREENoneTEC是全球最大的太阳能集热器生产商。2010年，该公司收到了一份非常特殊的订单。

GREENoneTEC目前正为沙特诺拉公主女子大学提供集热器，该大学位于沙特阿拉伯利雅，是全球最大的太阳能热电设备项目。

该大学城相当于一座独立的都市。它涵盖13个学院、住宿楼、研究中心和一所医院，可为4万名学生、教师及其他员工提供活动空间。

由GREENoneTEC超过3.6万平米（其面积相当于5个足球场）的集热板供应的能源可用于整个校园的热水和采暖。

Austria | Österreich

DI(FH) Sven Rixrath
T +43 / 2252 / 414 81
E office@aquaconsult.at
W www.aquaconsult.at

The trade-mark AEROSTRIP® is worldwide associated with the strip-shaped fine-bubble diffusers manufactured by Aquaconsult Anlagenbau GmbH since year 1986.

The continuously research and development transformed AEROSTRIP into the most economical fine bubble diffusers nowadays; the name AEROSTRIP is usually associated with the concept of efficient aeration technology in wastewater treatment.

Aquaconsult Anlagenbau GmbH manufactures exclusively in Austria, and is member of the Gütegemeinschaft Wassertechnik (quality-control association). Its production lines and its products are meeting the quality requirements of ISO 9001.

举世闻名的AEROSTRIP商标以Aquaconsult Anlagenbau GmbH于1986年生产的首台扩散式微气泡曝气系统为设计灵感。

持之以恒的研发活动推动着AEROSTRIP发展成为当代最节能的微气泡曝气系统；AEROSTRIP品牌已被污水处理行业视为高效曝气技术的代名词。

Aquaconsult Anlagenbau GmbH现为Gütegemeinschaft Wassertechnik（质量管理协会）的成员之一，其生产活动均在奥地利本土完成。其生产线及产品均符合ISO9001质量保证体系的品质要求。

AQUASYS Technik GmbH

4021 Linz
Austria | Österreich

Ing. Georg Greiner
T +43 / 732 / 78 92 - 429
E info@aquasys.at
W www.aquasys.at

AQUASYS is one of the leading manufacturers of highly efficient and environmentally friendly fire-fighting systems based on high pressure water mist. Successfully proven in numerous real scale fire tests, the innovative technology is able to combat both solid and liquid fires, such as fuel or oil, with a very short period of time.

The spreading of the fire is effectively prevented through the simultaneous 3-D expansion of the water mist and the associated cooling effect. Some of the applications include security in infrastructural facilities such as road tunnels, or high availability of data centres and high class industrial facilities, as well as the protection of valuable historical buildings.

AQUASYS是环保高效的高压细水雾灭火系统的顶级生产商之一。其创新技术可迅速扑灭多种固体和液体火灾（例如：由燃料或石油引发的火灾），这一点已在多个大规模的实战型火灾试验中得到成功验证。

受热后体积急剧膨胀的细水雾及其冷却降温效果可有效的抑制火情蔓延。部分应用被用于维护公路隧道及其他基础设施的安全、提升数据中心和高级工业设施的可用性以及保护富有价值的历史性建筑等。

The product range offered by BVS-Wassertechnik GmbH comprises systems for the flawless treatment of water. The company's customers come from trade, industry, the health sector and local councils.

The company has diverse references in the treatment of drinking water:

- Highly selective removal of uranium or other trace substances present in water
- Filtration technology and membrane processes such as ultrafiltration or reverse osmosis for use in boiler plants, air-conditioning and cooling circuits
- Ultrapure water from validated plants for the pharmaceutical industry or from systems for laboratories, analysers and for sterilisation in hospitals.

The company also offers mobile water treatment systems for disaster relief, as well as container plants for planned and unplanned downtime in industrial plants and power stations.

BVS-Wassertechnik GmbH的系列产品包括用于无懈可击的水处理系统。该公司的客户分别来自贸易、工业和医疗保健领域以及地方性机构。

该公司在饮用水处理领域研发出了多种极具参考价值的工艺：

- 有选择性的去除水中的铀或其他微量物质
- 过滤技术和膜分离工艺（如：适用于锅炉厂、空调冷水机组、热交换器的超滤或反渗透工艺等）
- 适用于制药行业认证设备、实验室系统、分析仪器及医院消毒室的超纯水。

该公司还可提供救灾用移动净水设备以及适用于工业设备和发电设备（在计划内／外的停机时间内）的集装箱式移动污水处理车。

PRODUCTS

CableRunner International GmbH is an Austrian company with headquarters in Vienna and offices in the USA, Germany, China and Russia.

The CableRunner technology is an efficient and sustainable solution for the installation of fibre optic networks with robotic devices. The use of existing infrastructure like sewer systems enables cost-efficient and fast construction work. Via patented robots, the proven and certified technology can be installed in all types of accessible and non-accessible sewers.

The system requires no digging or trenching, thus it can be used in dense urban and historic city areas. Project references include Vienna, Cleveland, Barcelona, Moscow, St. Petersburg, Calgary ...

CableRunner International GmbH是一家总部位于维也纳的奥地利公司，在美国、德国、中国加入俄罗斯均设有办事处。

CableRunner的可持续技术是以机器人安装光纤网络的高效解决方案。利用现有的基础设施（如下水道系统）可提高铺设工作的成本效益和速度。该公司通过机器人将已获认证的可靠技术方案部署于难以／易于进入的各类下水道之中。

该系统无需挖掘或开沟，因此可应用于人口密集的繁华都市和历史名城之内。在维也纳、克利夫兰、巴塞罗那、莫斯科、圣彼得堡、卡尔加里等地均设有参考项目。

1037 Wien
Austria | Österreich

T +43 / 1 / 711 47 - 0
E office@donau-chemie.com
W www.donau-chemie.com

The Donau Chemie develops, produces and sells PRECIPITATING AND FLOCCULATING AGENTS for the treatment of (waste) water, as well as products for special applications.

The products in the waste water technology are effective phosphate precipitating agents (on iron and aluminium basis). Additional effects are, amongst others, odour control, removal of sulphides and the elimination of filamentous bacteria.

The products in the drinking water technology act as flocculating agents (on iron and aluminium basis) and can therefore eliminate clouding substances and also many noxious substances. Additional effects are also the low residual aluminium content, the minimal change of the pH value as well as compliance with the EN883 and EN888 standards.

Donau Chemie主要负责开发、生产和销售用于（废）水处理的沉淀剂和絮凝剂以及其他用于特殊用途的产品。

用于污水处理的产品为高效的（聚铝和聚铁类）磷酸盐沉淀剂。同时还具有控制异味、去除硫化物、杀灭丝状菌及其他额外功效。

用于饮用水处理的产品为（聚铝和聚铁类）絮凝剂，可澄清浑浊的水体并除去多种有毒物质。同时还具有脱除水中的残留铝、调节酸碱度及其他额外功效，可确保饮用水符合EN883和EN888的标准。

OF APPLIED SCIENCES
UPPER AUSTRIA

The College of Upper Austria has a lot of varied experience in research & development. It supports companies and institutions in their research and development activities, developing individual solutions in special areas.

In doing so the college encourages trans-border research & development, on the other hand the interdisciplinary R&D is very important. Innovations, which provide the economy and society with a distinct advantage, are the result of the combination of economic, technical and social research areas.

The programme strategy focuses on energy and the environment, health management and mobility research.

The Salzburg University of Applied Sciences offers 27 degree programmes in the disciplines of Engineering, Business and Social Sciences, Design, Media and Arts, and Health Studies.

Modern teaching content, top-notch amenities, close cooperation with companies and partner universities, as well as qualified teachers guarantee a practical training at an international level.

In particular, the Salzburg University of Applied Sciences offers the „Smart Building“ degree programme, as well as the master degree „Smart Buildings in Smart Cities - Energy Infrastructure and District Renovation“ from autumn 2016 (subject to approval by AQ Austria).

In studying Information Technology & Systems Management students can intensify their knowledge of “intelligent energy systems” (bachelor) or „future energy systems” (master).

萨尔兹堡应用科技大学共推出了27个学位课程，包括工程、商业与社会科学、设计、媒体与艺术以及健康研究等。

现代化的教学内容、顶尖的设施、与各大企业和合作大学的密切协作以及高素质的教师团队确保了务实的校风和国际一流的教学水平。

尤其引人注目的是，萨尔兹堡应用科技大学还自2016年秋推出了“智能建筑学”学士课程以及“智能城市能源基础设施与地区翻新工程中的智能建筑”硕士课程（须经奥地利质量保障与认证署批准）。

就读信息技术与系统管理专业的学生有望通过“智能能源系统学”（学士学位）或“未来能源系统学”（硕士学位）进一步深化自己的专业知识。

RESEARCH

The R & D activities of the Technikum Wien have grown significantly in recent years.

Amongst other things, the main focus is on

- eHealth: the focus is on the exchange, interoperability and use of health data, but not only in the Ambient-Assisted-Living area. The special thing about this topic is that it is extremely interdisciplinary.
- Renewable energy: the focus is on urban technologies and the cities of the future and extends to mobility issues.
- Embedded systems: the competencies relate to platforms and development tools for intelligent products in various fields, including the Smart Homes and Assistive Technologies fields of application.

近年来，Technikum Wien的研发活动已大幅增加。

其重点项目包括：

- 电子医疗：重点在于健康数据的交换、互操作和使用（不限于环境辅助生活技术领域）。这一课题的特别之处在于其跨学科性。
- 可再生能源：重点在于与城市有关的技术、未来的城市及交通问题。
- 嵌入式系统：与各领域智能产品的平台和开发工具有关的技术（包括智能家居和辅助技术及其应用）。

E info@fhv.at
W www.fhv.at

One of the most important research areas at the Technical College of Vorarlberg is renewable energy and energy efficiency.

The Smart City Rheintal project is developing new concepts for intelligent cities and living areas. Above all the project focuses on the reduction of emissions – the Rhine Valley with its 29 local authorities, is characterised by a polycentric structure and is one of the most dynamically growing economic areas in Central Europe.

One of the major feature of the project is the interlinked activities in a total of four construction areas at 3 levels:

- production of energy for future
- mobility in the future and
- living in the future

www.smartcityrheintal.at
www.fhv.at/fhv-science

可再生能源和能源效率是福拉尔贝格技术学院最重要的研究领域之一。

莱茵河谷智能城市项目正致力于开发智能城市和居民区的全新理念。该项目以减排为一切工作的重心：莱茵河流域会同周边的29个地方政府采用了多中心的发展模式，是欧洲中部最具活力、蒸蒸日上的经济特区。

从三个层面出发的四大工程之间紧密相连的活动是该项目的主要特点之一：

- 面向未来的能源生产；
- 未来的交通系统；以及
- 未来的人居环境

RESEARCH

The effectiveness of all technical solutions within socio-technical systems of transport and mobility depends on what use people make of different mobility options.

FACTUM is a private research institute with a focus on mobility and transport research. Since 1988 FACTUM has been examining these from a social scientific and psychological perspective.

The central task is the development and application of procedures which enable comprehensive analyses of human behaviour and underlying needs and interests. This leads to a sustainable development. FACTUM follows this goal mainly through interdisciplinary research.

对于交通运输业而言，社会技术系统内所有技术解决方案的有效性将取决于人们如何利用不同的交通模式。

FACTUM是一家私人研究所，主要从事交通运输研究。自1988年成立以来，FACTUM一直尝试社会科学和心理学的角度开展相关研究。

其中心任务在于程序的开发和应用，以便针对人类行为及其潜在需求和利益开展全面分析。最终旨在促进社会的可持续发展。FACTUM主要通过跨学科达成这一宗旨。

Building and refurbishment with GAP³ Integral Facade Technology.

The combined facade and building technology by GAP³ solutions saves on energy and unites efficiency and ecology.

The pre-manufactured GAP:skin enables fast assembly on site; the building remains habitable. The thermally optimized building shells ultimately enable the use of simple, and decentralized building equipment systems.

Energy efficiency with GAP³ solutions upon renovation and new construction means:

- Building without active heating systems
- Remarkable reduction in ultimate heating energy and CO₂ emissions
- Living with increased comfort and coziness

将GAP³整体立面技术纳入建筑和装修项目。

GAP³解决方案中欧的立面和建筑一体化技术可节约能源并将提高效率与保护生态有机结合。

预制GAP产品：可在现场快速组装外墙结构，不会给居民的正常生活带来影响。经热能优化的建筑外墙有助于推广简约的分散式建筑设备系统。

在新建建筑和翻修工程中采用高效节能的GAP³解决方案，即可在下列领域取得进展：

- 无需安装主动式加热系统的建筑
- 显著减少热能和二氧化碳排放量
- 更加舒适安逸的家居环境

IFE was founded in 1947 as Institute for Technical Research and Development.

For more than 60 years IFE has been dealing with the construction of machines for bulk material handling. Today, IFE is among the world's leading manufacturers of electro-magnetic and electromechanical vibroconveyors, screening machines and magnetic separators.

The very complex problems of the recycling and environmental industry require specific solutions. IFE provides a wide range of excellent screens, separators, magnets and eddy current separators especially for the recycling industry.

The focus on practical, efficient solutions in all fields results in secondary raw materials of highest quality and purity.

IFE成立于1947年，全称为技术开发研究院。

60多年来，IFE一直致力于散装物料处理设备的开发工作。时至今日，IFE已经发展成为电磁和机电振荡器、筛选机和磁选机的全球领先品牌。

回收业和环境业的问题极其复杂，需要特定的解决方案。IFE可为回收业提供优质的筛选机、分离器、磁选机和涡流分离器等丰富的产品。

该公司致力于为所有领域提供实用而高效的解决方案，确保了二次原料的一流品质和超高纯度。

2345 Brunn am Gebirge
Austria | Österreich

Nick Stein, Head of Marketing
T +43 / 660 / 317 22 05
E nick@indoo.rs
W www.indoo.rs

indoo.rs is a leading software provider for real-time indoor positioning and navigation. Applications for the technology include finding your gate at an airport and even helping visually impaired people navigate new indoor environments.

One core to the business is the provision of the technology as an SDK (Software Development Kit). This allows app developers, agencies or direct B2B customers (such as San Francisco Airport, KLM, Messe Schweiz, Hofburg, etc.) to build customized apps. A second one is the licensing of the core technology to mobile device and chipset manufacturers.

The company has its head office with 22 employees in Brunn am Gebirge, a development centre in Vienna and a sales office in Palo Alto, USA. Indoo.rs is supported by three investors, Speedinvest, Techinvest and Tecnet Equity.

indoo.rs是一家实时室内定位和导航软件的领先供应商。其技术应用包括：在机场查找登机门以及为处于陌生环境中的视障患者提供室内导航服务。

以软件开发工具包（SDK）的形式提供技术是其核心业务之一。这将有助于软件开发人员、相关机构及直接的B2B客户（如旧金山国际机场、荷航、瑞士展览公司、霍夫堡宫等）设计出定制的应用程序。第二项核心业务就是面向移动设备和芯片组制造商的核心技术许可。

该公司总部位于山麓布伦，拥有22名员工，同时还在维也纳和美国的帕洛阿尔托先后设立了的研发中心和销售办事处。Indoo.rs该公司由Speedinvest、Techinvest和Tecnet Equity共同投资。

MATTRO
Driven By EcoLogic

PRODUCTS

Ecological, electric mobility and energy concepts for a future worth living in.

Innovative and meaningful sustainable products from three different divisions - Mattro Motors, Mattro Drives and Mattro Energy - provide tailored solutions using the latest technologies available.

The portfolio is manifold, ranging from the development of electronic vehicles to the construction of robotic platforms and solutions in the generation and storage of renewable energy. Following the development and design, the products are handcrafted and marketed in the company's own factory.

"Our products are the logical result of passion, sense and team spirit."
Alois Bauer, Founder

绿色环保、电动交通和节能理念打造宜居未来。

三大部门 (Mattro Motors、Mattro Drives和 Mattro Energy) 富有意义的创新式可持续产品可提供基于最新技术的定制解决方案。

其业务范围涵盖广泛，包括：研发电动汽车、构建自动化机械平台以及可再生能源生产和存储的解决方案。自主开发和设计的产品均在该公司旗下的工厂内进行加工和销售。

"我们的产品是将激情、责任和团队精神融于一体的成果。"
Alois Bauer，创始人

NES is a global smart energy leader in the worldwide transformation of the electricity grid into an energy control network, enabling utilities to connect to their customers, offer new services and help them compete more effectively, with solutions that help to reduce operating costs and provide expanded services.

The NES solution is based on OSGP, which is used in more than 4 Mio. smart endpoints by utilities around the world.

The NES system includes smart meters, load management modules, control nodes, central head-end software and unified intelligent energy management software. The UIEM Software manages electricity-, gas-, water- and heating meters and it provides Grid Management functionalities like Load, Streetlight- and Power Quality Management.

NES是全球智能能源管理领域的领导品牌，致力于将全球各地的电网转变成能源智能管理系统，助力公共设备更顺利的与客户连接，提供全新服务以助其更有效的参与竞争，同时提供可降低运营成本并拓展服务范围的解决方案。

全球超过4百万智能电网端点所采用的OSGP是NES解决方案的基础。

NES系统包括：智能电表、负荷管理模块、控制节点、中央前端软件和统一的智能能源管理软件。UIEM Software具备电网管理功能（如负荷、路灯及电能质量管理），可对电、气、水及供热设施进行管理。

PRODUCTS

Ochsner-Straße 1
3350 Haag
Austria | Österreich

T +43 / 5 / 04 245 - 8
E kontakt@ochsner.at
W www.ochsner.at

OCHSNER Wärmepumpen began industrial production of heat pumps in 1978 and was one of the first European manufacturers to do so.

Today OCHSNER is one of the best known European manufacturers in this sector and enjoys the reputation as a leader in the field of heat pump technology. OCHSNER provides a complete range of heat pumps for every source of heat (water, ground, air) and all performance classes.

Every application is catered for - from heat pumps for heating systems (also with a heating / cooling function) to commercial large-scale heat pumps and process water heat pumps.

The products are not only used in the core European markets but also in countries overseas as far afield as Australia. The Haag production site manufactures up to 8,000 heat pumps per year.

OCHSNER Wärmepumpen于1978年开始批量生产热泵，是欧洲最早的热泵生产商之一。

时至今日，OCHSNER已发展成为欧洲最知名的热泵生产商之一，被誉为热泵技术的领导品牌。OCHSNER可提供一系列不同热源的热泵产品（水源热泵、地源热泵和空气源热泵），涵盖各种档次的性能等级。

供暖系统热泵（带供暖／供冷功能）、大型商用热泵和工艺用水水源热泵……该公司可满足各类应用的需求。

其产品在欧洲核心市场及远至澳大利亚的海外市场中均被广泛采用。合格生产中心可每年生产8000台热泵。

E office@probig.com
W www.probig.com

PROBIG is internationally successful with water recycling and scraper systems made from quality non-metallics.

New plants and retrofitting

The top-quality non-metallic parts are designed for wet & sludgy as well as chemically aggressive areas. They are used as chain & flight scrapers, DAF and API separators for the collection of floor sludge and floating waste in rectangular pools. Even existing plants can be retrofitted easily and cost-efficiently. PROBIG developed and patented specialized solutions for many clients.

Advantages of top-quality non-metallics:

- easy to service
- ISO and TÜV certified quality
- low power requirements
- long operating life and reliability

PROBIG以高品质非金属材质的水循环和刮泥系统而享誉全球。

全新设备和改装设备

优质的非金属零件适用于含污水和淤泥及高腐蚀性的区域。其产品包括清除矩形游泳池地板淤泥和漂浮垃圾的DAF和API分离器和链条式刮泥机。即使是现成的设备亦可被便捷的改装以节省成本。PROBIG为多位客户开发了专业的解决方案并申请了专利。

优质非金属零件的优势：

- 易于维护
- 已获ISO和TÜV认证的一流品质
- 低功耗
- 使用寿命长，可靠性高

Reprotex - The Water Recycler

Reprotex is an internationally active engineering company specialising in mobile wastewater treatment of process water for recycling.

Main applications are the treatment of high pressure blasting water from following industries: Concrete (construction site), Bitumen (road construction site), Coating (ship hull maintenance), Rubber (runway, road), Metal (automotive).

The treatment process enables a reuse of over 90% of the water which saves resources and reduces expensive disposals.

Reprotex developed a wide range of machines to treat wastewater from 25 l/min up to 200 l/min.

Reprotex - The Water Recycler

Reprotex是一家活跃于国际市场的工程公司，专门面向工艺用水开发移动式污水处理设备。

其主要应用涵盖下列行业用高压水的处理工艺：混凝土（施工现场）、沥青（公路施工现场）、涂料（船体维修）、橡胶（飞机场跑道和公路）及金属（汽车制造业）。

处理过程中可回收利用高达90%的水，有助于节约资源并减少高昂的处理费。

Reprotex开发了一系列机械（污水处理效率：25-200 l/分钟）。

PRODUCTS

RSB provides specialist formwork services for circular concrete structures. The company offers tailor-made formwork solutions for:

- Digesters (egg-shaped or cylindrical)
- Water towers
- Windmill towers, telecommunications towers
- Circular tanks (e.g. LNG tanks, water reservoirs) and silos
- Funnels, cones, spheres, domes
- Tunnels
- Cooling towers

RSB offers its formwork service on a rental basis. RSB is your reliable partner - from the initial concept to completion of the formwork project.

RSB还可为圆形混凝土结构提供专业的模板服务。该公司可提供定制的模板解决方案：

- 加热消化池（椭圆形或圆柱形）
- 水塔
- 风力涡轮塔和电信塔
- 圆形储罐（如：液化天然气储罐和储水罐）和筒仓
- 漏斗形、锥形、球形和拱形模板
- 隧道
- 冷却塔

RSB可提供模板租赁服务。从最初的概念方案到模板工程竣工，RSB将一直是您值得信赖的合作伙伴。

SolarTiger GmbH

Freiling 23
4942 Gurten
Austria | Österreich

T +43 / 7757 / 63 28 - 0
E office@solartiger.at
W www.solartiger.at

The SolarTiger company deals with the dimensioning and construction of solar sludge drying plants.

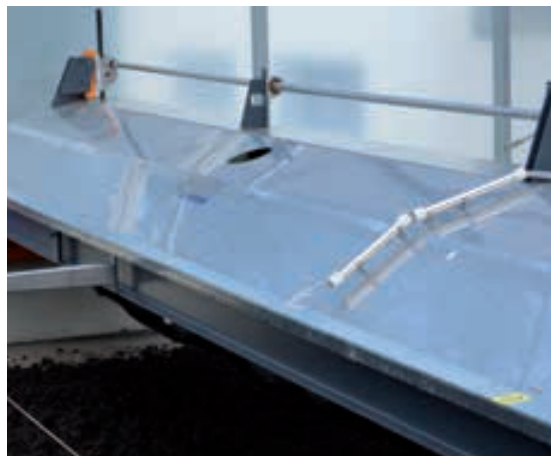

The objective is to reduce the mass of the sewage sludge which has to be disposed of. The SolarTiger technology makes use of natural solar radiation, which minimises the operating costs and results in an optimally economic disposal of sewage sludge.

The SchlammFIT technology is a drainage process for sewage sludge followed by drying, which is particularly suitable for smaller sewage plants as it ensures greater operational stability.

SolarTiger公司主要从事太阳能污泥干化设备的规划和建造工作。

其目的旨在减少亟待处理的下水道的污泥量。SolarTiger的技术可利用太阳辐射能最大限度的降低运行成本，开发出最具经济效益的下水道污泥处理方案。

SchlammFIT技术是下水道污泥干燥后的排水工艺，特别适用于小型污水处理设备，可确保更高的操作稳定性。

SOLID specialises in all aspects of solar thermal energy plants. Since 1992, SOLID has been planning, building, delivering, assembling and operating large-scale solar plants worldwide, providing hot water, heating rooms and supplying process heat as well as solar cooling. SOLID is one of the world's leading companies in the field of large-scale solar plants.

Regular customers are:

- In the industrial sector: Foodstuffs purveyors, textile industry, plastics processing industry and other similar industries
- In the field of solar cooling of large buildings such as airports, administrative offices, banks
- Tourist establishments: hotels and resorts, sports complexes
- Health establishments: hospitals, old peoples' homes
- District heating and cooling systems

SOLID主营所有与太阳能热电设备有关的业务。自1992年以来，SOLID一直在全球各地参与大型太阳能发电设备的规划、建造、配送、组装和运行业务，并提供供热设备、采暖室以及工艺用热和太阳能供冷设备。SOLID是全球首屈一指的大型太阳能热电设备供应商。

长期客户包括：

- 工业领域：食品供应商、纺织工业、塑料加工工业及其他同类行业
- 可采用太阳能制冷系统的机场、行政机关大楼、银行等大型建筑
- 旅游业：酒店和度假村及综合型运动场馆
- 保健业：医院和养老院
- 区域性供热和供冷系统

SCHIEBEL

From the mid-80s the Schiebel company, which was founded in 1951, focused on the development and production of high-tech mine detectors, which made it the world leader - not least due to a large order by the US Army.

In the mid-90s, the company began as a pioneer in the development and production of unmanned helicopters and was able to successfully expand its image as a world leader with the CAMCOPTER® S-100 in this area.

The CAMCOPTER® S-100 requires neither start nor runway, can fly in narrow valleys, remain stationary in the air and land safely in windy conditions. The main areas of application: rescue missions, monitoring of pipelines, water, electricity and communication lines, as well as large industrial sites and plants.

Schiebel公司成立于1951年，自上世纪80年代中期迄今，一直致力于研发和生产高科技地雷探测器，美国陆军及其他机构的大批订单使其成为享誉全球的一线品牌。

上世纪90年代中期，该公司开始涉足创新式无人直升机的研制和生产领域，CAMCOPTERS®-100无人直升机令其全球领导地位得到进一步巩固。

CAMCOPTER®S-100无需启动或跑道，可在狭窄的山谷中飞行、在空中保持静止、在大风环境中安全降落。主要应用领域：救援任务、油气管道、水电系统和通信线路以及大型工业用地和厂房的监测。

What is e-mobility sharing?

The desire and the need for individual mobility will look just the same in five, ten or twenty years, as is it does today. The type and method of mobility, however, is changing significantly.

Issues such as the rapid increase of urban population, the consumption of limited resources and the environmental burden in cities, or the already exceed capacity of public transport in many areas, are creating fundamental pressures.

SYCUBE offers advanced and proven e-mobility sharing solutions in the following areas:

- Urban mobility (including transport authorities)
- Smart cities and property developers
- Corporate mobility
- Tourist mobility (hotels, tourist areas, national parks, health tourism)

何谓电动汽车共享?

与当代相比，未来5年、10年和20年对个性化交通方式的需求将有过之而无不及。交通工具的类型和模式正经历着巨大的变化。

城市人口的快速增长、有限资源的持续消耗、城市的环境挑战及多个地区的公共运输能力不足的问题，都对社会造成了巨大的压力。

SYCUBE可在下列多个领域内提供先进而成熟的电动汽车共享解决方案：

- 城市交通（包括运输部门）
- 智能城市和地产开发
- 公共运输
- 旅游运输（酒店、旅游区、国家公园及医疗旅游）

TAUROB

taurob is a manufacturer of UGVs (unmanned ground vehicles) for dangerous tasks. The robots are deployed where dangers due to structural collapse, explosion risk, radiation or harmful substances exist.

The rugged and waterproof platform provides camera images and situational awareness in hazardous environments. It is able to accomplish different tasks such as localization of persons as well as riskless detection and sample taking of hazardous materials.

Characteristics:

Very easy to use thanks to an intuitive control system paired with intelligent assistance functions; operation in explosive atmospheres (ATEX); waterproof (IP67); versatile interfaces for plug and play integration of various measurement devices.

taurob是执行高危任务的无人地面载具 (UGV) 的制造商。该机器人技术可用于执行涉及建筑坍塌、爆炸危险、辐射危害或有害物质的高危任务。

这一坚固耐用的防水平台可提供适用于危险环境的相机拍摄和态势感知功能。它可以完成多种任务，如搜索定位及有害物质的风险检测和取样等。

特点:

直观易用的控制系统和智能辅助功能；可在有爆炸危险的环境中执行任务（ATEX）；防水（IP67）；即插即用型通用接口，集成多种测量设备。

The process of strong urbanisation, the pressure of increased competitiveness and the endangered quality of the environment mean that cities are now faced with enormous challenges. Instead of purely sectoral technical solutions, more integrated solutions based on comprehensive learning processes for sustainable development are necessary.

Smart planning approaches are needed which effectively tackle such challenges and support the positioning of cities in collaboration with different groups of stakeholders. The smart city approach developed by the Centre of Urban and Regional Science at the TU Vienna is encouraging the creation of sustainable and smart urban innovations.

城市化的强劲势头、日益白热化的竞争压力和倍受威胁的环境状况意味着各大城市正面临着巨大的挑战。基于综合学习方法的一体化解决方案而非单一行业的技术解决方案，是维持可持续发展的必要因素。

智能规划方案可有效的应对此类挑战，并可与不同利益群体紧密协作为城市定位提供支持，其重要性可见一斑。维也纳技术大学城市和区域科学中心推出的“智能城市”计划致力于促进可持续的智能城市创新技术不断发展。

Wallner & Neubert is a full-service provider of products and system solutions for drainage technology, drinking water supply, wastewater treatment and sewage disposal and provides complete solutions from the source to the sea!

Well-known brands and product lines have been established by this traditional firm which was founded in 1894, and the brand name PURATOR is even better known in some circles than the name of the firm itself.

The product range is complemented by representative offices and by the product lines of reputable suppliers with the highest quality demands.

The company is therefore in a position to provide comprehensive advice, develop solutions and to meet your requirements in full.

Wallner & Neubert是一家成套服务供应商，可面向排水、饮用水及废水和污水处理领域提供产品和系统解决方案，同时可提供从源头至海洋的整体解决方案！

这一家创立于1894年的传统企业早已确立了多个知名的品牌和产品系列，旗下品牌PURATOR的知名度在某些领域甚至远远超过了公司本身。

其代表处和享有盛誉的供应商的高品质产品与其产品系列相辅相成，互为补充。

该公司可提供全面的意见，开发完善解决方案，并全方位满足客户的需求。

Weatherpark GmbH

Meteorologische Forschung und Dienstleistungen

Gardegasse 3/3
1070 Wien
Austria | Österreich

T +43 / 1 / 522 37 29
E info@weatherpark.com
W www.weatherpark.com

“Well-being in the city” - this is the mission of the meteorologists and technicians at Weatherpark. Their aim is to establish pleasant wind and human comfort conditions as well as a good microclimate in cities and districts. For example, Weatherpark’s experts analyzed the wind comfort conditions in the new urban district around Vienna’s central railway station.

The consulting sessions and studies pave the way for improved well-being of inhabitants and users of residential and commercial buildings in open spaces such as passageways, terraces, outdoor dining areas, etc.

The wind, solar radiation and other factors are therefore largely perceived as pleasant. Furthermore, the city is supplied with sufficient fresh air. In turn, the contracting authorities benefit from the improved usability of the properties.

“幸福城市” — 这就是Weatherpark的气象专家和技术人员的使命。他们的目标旨在基于风振舒适度创建舒适的宜居环境，为城市及周边地区营造宜人的微气候条件。例如，Weatherpark的专家们可针对维也纳中央火车站周边新城区的风振舒适度进行分析。

咨询会和研究项目为不断改善住宅小区和商业建筑的开放空间（如通道、露台、户外用餐区等）的环境质量奠定了基础。

风、太阳辐射及其他因素能在很大程度上提升人体舒适度。得益于他们的工作，整座城市变得氧气充足、空气清新。同时，公共建筑利用率的提高也将令市政部门受益。

THORN
LIGHTING PEOPLE

Thorn, a member of the Zumtobel Group, is a globally trusted supplier of outdoor and indoor luminaires with integrated controls. The mission of Thorn is to make great lighting available to all.

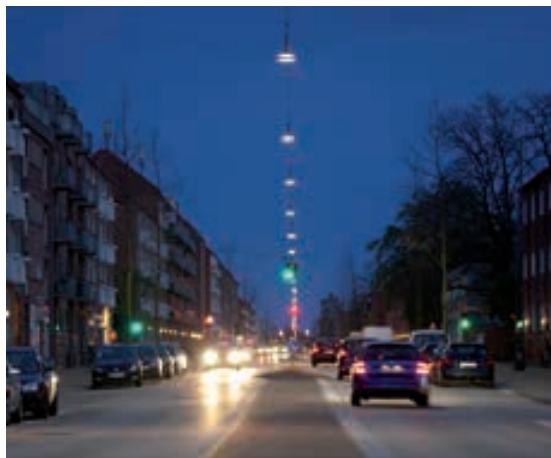

High performance lighting solutions from Thorn can be found in many different applications such as sport, road, tunnel, cityscape, office, education or industry.

Founded in 1928, Thorn have years of experience in providing lighting solutions. Thorn's target is to become the partner of choice in an open ecosystem, integrating smart solutions into the digital city, using the lighting infrastructure as connectivity points.

Thorn是Zumtobel集团的成员之一，现已发展成一家全球客户至为信赖的室外／室内照明集成控制系统品牌。Thorn以为所有用户提供上佳的照明设备为己任。

Thorn的高性能照明解决方案可被应用于运动场馆、公路、隧道、城市景观、办公大楼、教育机构或工业及其他领域。

Thorn成立于1928年，在照明解决方案领域拥有多年的丰富经验。Thorn的目标：将智能解决方案融入数字城市，利用照明基础设施作为连接点，发展成为开放的生态系统中的首选合作伙伴。
